BIPZ25-002295	PZ	Issued	4/15/2025	\$300,000.00	This project is to re-route the city water piping from the point where it is supplied within our site boundary to the buildings, safety showers, and processes where water is consumed on site property. It will be constructed of 4" plastic piping and 2" size galvanized steel piping. There are approximately 1,750 feet of piping that we will install. There is an existing drainage trench that is approximately 18" deep and 18" wide that we will extend in length by approximately 115 feet in order to accommodate the new pipe route by fastening the new pipes to the side wall of the trench; this trench drains to an on-site sump for processing. The new piping will be provided with a back-flow preventer in addition to any back-flow preventers located outside the site fence line.	1	099030031	501 NICHOLS RD	BAY POINT
