Project Name: Selby Solar

Building Permits Issued

Status Date Between 12/22/2025 and 12/28/2025
City: ALL Inc/Uninc: Unincorporated

Project Location: 90 SAN PABLO AVE,
Crocket, CA, also in the County GIS system as
51 OLD COUNTY RD, Crocket, CA. Parcel
#355-020-001

The Selby Solar project scope includes the installation of a 1,500 kWac ground-mount, fixed-tilt, photovoltaic (PV) solar generation facility, to be located on the vegetated hillside of the parcel (along the NE edge of the property), outside of the existing Terminal Facility fenceline. The installation will not impact any of the infrastructure of the existing facility (other than the electrical interconnection point). There are no buildings, roads, water lines, sewer systems, or lighting features included in this proposed project.

The array racking will conform to the existing hillside contours; no mass grading or tree removal is proposed. Structural details are included in the attached Plans.

The equipment to be installed consists of 4,080 450W PV Modules, ten (10) 150kW Inverters, One (1) 600V Switchboard, One (1) 600V:4160V Transformer, One (1) 4160V AC Disconnect Switch, Monitoring equipment, and various other electrical elements and equipment.

The array will be tied into the existing on-site 4160V Switchgear, behind the meter (PG&E Meter #1010078706), and net-metered by PG&E for any excess generation that is exported from the facility. The purpose of the installation is to generate renewable energy for the Owner's existing terminal infrastructure.

Equipment information and construction details are included in the attached Plans.

Lela Jones, with CCHHealth, confirmed that her department does not need to review the projects, as it is not impacting a septic system.

Sean Tully, with the Planning Department, has completed a preliminary review of the project and confirmed that it will not require a discretionary planning review.
